DANGER:
When using an electrical furnishing, basic precautions should always be followed, including the following: Read all instructions before using (this furnishing).

IMPORTANT SAFETY INSTRUCTIONS
SAVE THESE INSTRUCTIONS.

BULB REPLACEMENT INSTRUCTIONS:
WARNING
Do not remove the cap on the globe or add anything to the globe. The air space at the top of the globe is necessary in order to allow for the expansion of contents. Breaking the seal on the globe shall void the warranty.

First Aid:
For direct skin contact: Clean the affected area thoroughly with soap and water. Remove and wash contaminated clothing immediately. If irritation occurs, seek medical attention.

Do not operate where aerosol (spray) products are being used or where oxygen is being administered.

Ensure all parts are at room temperature before running. Unplug lamp before putting on or taking off parts.

Exercise caution when handling the lamp while it is plugged in. The lamp will take 2 to 3 hours to cool after it has been turned off.

Do not run lamp for longer than 10 hours at a time.

To disconnect, turn all controls to the off position, then remove plug from outlet.

Do not touch or near lamp during use. Wait 2 hours for lamp to cool completely after turned off.

Check and see if the light bulb and socket in the lamp base are centered and tightened prior to turning on the lamp. The socket may have moved during shipping. If this has occurred, then gently use your fingers to re-center the socket.

When not in use, store the furnishing in a cool, dry place on a flat surface. Wrap the cord around the base of the LAVA® lamp and keep away from moisture.

Do not use any other means to heat up motion lamp besides bulb provided or attempt to cool it down artificially.

Do not use the lamp around or near students.

Do not place the lamp near sources of heat or cold, such as a heater or air conditioner. Lamp should be operated at room temperatures between 68-75º F / 21-24º C.

Note: All LAVA® motion lamps have a free floating coil inside the globe. This is to accelerate the heating process.

Lava® Brand Motion Lamp (which includes base, glass globe, cap)

Lava® LAMP INSTRUCTION MANUAL for use with series 1900, 2000, 4000, 5000 and 8000
